

Hate Gas Stations?

DiamondFIRE spark plugs use less gas and increase performance!

These days, gas prices are higher every time you go to the pump.

Think there's nothing you can do about it? Think again.

Install a set of E3 DiamondFIRE spark plugs in your car, truck or van. The advanced electrode design of E3 DiamondFIRE spark plugs generates a more powerful, more consistent spark...and directs it right to the heart of the fuel-air mixture. That means more complete fuel burn... increased power and fuel efficiency...and reduced emissions.

Ask for E3 DiamondFIRE spark plugs at your local auto parts store. You'll feel the power and performance... and you'll see the savings!

Spark Plugs
WITH **DiamondFIRE** TECHNOLOGY
