

Want the Wrinkles to Vanish?

Who doesn't? That's why I'm participating in a special medical study at the SFBC Center. They're testing a new skin cream that could help minimize those bothersome wrinkles and rough spots caused by the sun.

Wouldn't that be nice?

If you're between 40 to 70 years old with a fair to medium complexion, call today, and become a research participant. We need both male and female participants.

This study requires a few visits to the SFBC Center in Ft. Myers. When you complete the study, you'll be paid \$175.

Want to see those wrinkles and sun spots go away? Wishing won't make them disappear, but calling SFBC just might.

Wouldn't that be nice?
